The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 10/517,607	Applicant(s) SCHASCHEK ET AL.	
	Examiner Heather D. Smith	Art Unit 2854	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 26 - 27 and 38 - 39, 41-42, 44, 46, 48, 50, 52, 54, 56, 58, and 60 are drawn to a printing group having cylinders and support elements for adjusting the contact pressures between the cylinders.

Group II, claims 29 - 37, 40, 43, 45, 47, 49, 51, 53, 55, 57, 59, and 61 are drawn to a printing group having printing pressure adjustable as a function of the printing forme.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I (claim 26) is drawn to a printing group with forme cylinder, transfer cylinder, and counter-pressure cylinder, and two support elements to set a first contact pressure between the transfer and counter-pressure cylinders and means for adjusting the distance between forme and transfer cylinders to set a second contact pressure. Group II (claim 29) is drawn to a printing group with a forme cylinder, transfer cylinder, and counter pressure cylinder and waterless printing forme, and means for adjusting contact pressure between forme cylinder and transfer cylinder as a function of property of printing forme. The printing pressure in Group I (claim 26) is not necessarily adjustable

as a function of printing forme properties, as per the essential feature of the second invention (claim 29), and vice versa. Contrary to PCT Rule 13.1, the two inventions are not linked by a technical relationship in the form of same or corresponding special technical features in the two independent claims, claims 26 and 29, and therefore do not relate to a single inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Heather D. Smith whose telephone number is 571-270-1334. The examiner can normally be reached on 8-5 M-Thurs every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on 571-272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
